EDUCATION

Babasaheb Bhimrao Ambedkar University (BBAU), Lucknow **2020 –2024**

Bachelor of Technology in Computer Science(CGPA-8.08) *Lucknow,UP*

EXPERIENCE

General Enterprises (Full-Stack Developer) **May 2025 - *Present***

- Built **Zaplyn**, a Django–React commerce platform with AI-powered product generation and automated digital delivery.
- Deployed Omnistack infrastructure on **AWS (ECS, EC2, S3)** using containerized services and **CI/CD** pipelines.
- Implemented **dynamic DB routing, background jobs,** and **payment workflows** for subscriptions and seller payouts.

Sitekart (Web Developer) **June 2024 - March 2025**

- Built responsive frontend interfaces using React, translating requirements into reusable components and user-facing web experiences.
- Developed basic Python applications and utilities, integrating backend logic with practical web workflows.
- Created and customized WordPress websites, including themes, layouts, plugins, and content-driven pages.

Interpret Media (Web Development Intern) **August 2023 - Nov 2023**

- Built responsive websites using HTML, CSS, JavaScript, and WordPress, customizing themes and plugins.
- Assisted in creating wireframes and prototypes, contributing to the visual design and user journey mapping.

Freelance Work (Full Stack Developer) **Dec 2022 - *Present***

- Developed responsive, SEO-friendly **WordPress and Shopify websites** for diverse clients, translating business requirements and designs into production-ready web experiences.
- Built and customized **WordPress themes, custom plugins, Elementor layouts, WooCommerce functionality, Shopify themes/sections, and dynamic components** using PHP, JavaScript, HTML, and CSS.
- Integrated and configured **third-party APIs, webhooks, multilingual functionality, caching, security, and SEO solutions**, using tools such as Rank Math, Wordfence, W3 Total Cache, and WooCommerce to deliver performant and scalable websites.

PROJECTS

Zaplyn — AI-Native Commerce Platform (Live)

- Built an **AI commerce agent using LangGraph ReAct** to understand natural-language requests and execute workflows across shops, products, markets, orders, inventory, and analytics.
- Designed a **structured AI execution pipeline** with Pydantic schemas, tool routing, dependency resolution, validation, and confirmation gates, while implementing **AI-powered product generation and bulk catalog creation** that reduced manual listing time by **~80%**.
- Integrated **Stripe subscriptions and Wise payouts** with webhook automation and background jobs.

Heart Health India Foundation (Live)

- Built custom WordPress functionality and plugins with dynamic sections and automated Google Sheets data integration.
- Developed custom UI sections and reusable components tailored to the organization's content and workflows.
- Implemented dynamic content fetching and automation to reduce manual content management.

Summer Splash (Live)

- Designed and developed a custom WordPress theme with a highly visual, animation-focused UI.
- Built custom sections, layouts, interactions, and responsive experiences from scratch.
- Focused on modern visual design, smooth animations, responsiveness, and engaging user experience.

Rug Weavers (Live)

- Built a **custom WooCommerce storefront** with a premium, responsive UI and tailored product browsing experience.
- Customized **WooCommerce layouts, product sections, navigation, and frontend components** to match the brand identity.
- Optimized the website for **responsive design, performance, SEO, and seamless shopping experience**.
